

The Indiana Family and Social Services Administration

INDIANA SYSTEM OF CARE PROVIDER TRAINING

Presented by:

Toscha Wilkins, MSW

SOC Program Grant Director

System of Care

A spectrum of effective, community-based services and supports for children and youth with or at risk for mental health or other challenges and their families, that is organized into a coordinated network, builds meaningful partnerships with families and youth, and addresses their cultural and linguistic needs, in order to help them to function better at home, in school, in the community, and throughout life.(Stroul, Blau & Friedman, 2010)

System of Care – Core Values

1. Family driven and youth guided, with the strengths and needs of the child and family determining the types and mix of services and supports provided
2. Community based, with the locus of services, as well as system management resting within a supportive, adaptive infrastructure, processes, and relationships at the community level
3. Culturally and linguistically competent, with agencies, programs, and services that reflect the cultural, racial, ethnic, and linguistic differences of the populations they serve to facilitate access to and utilization of appropriate services and supports

INDIANA SYSTEM OF CARE IN SOC Strengthening Our Communities

Vision – All young people, surrounded by supportive adults, achieve wellness, engage in their community, and together promote wellness for generations to come.

Mission – To model and provide leadership, guidance, technical assistance, policy and change, at the state level to ensure that local SOC's are available for every child, youth, young adult and their families.

SOC Strategic Plan
